Hand Hygiene solutions address:

- Measuring the specific, high-impact causes of hand hygiene failures in a facility to target solutions to those causes.
- Making washing hands a habit – as automatic as looking both ways when you cross the street or fastening your seat belt when you get in your car.
- Commitment of leadership to achieve hand hygiene compliance of 90+ percent.
- Serving as a role model by practicing proper hand hygiene.
- Holding everyone accountable and responsible – doctors, nurses, food service staff, housekeepers, chaplains, technicians, therapists.
- Providing easy access to hand hygiene equipment and dispensers.
- Creating a place for everything: for example, a health care worker with full hands needs a dedicated space where he or she can place items while washing hands.
